

CMU Consulting Projects Website Revamp

About the Project

The Information Systems Department at Carnegie Mellon University is committed to advancing the integration of technology into our educational and partnership practices. This project has introduced a modernized, dynamic website that seamlessly interacts with a backend database to enhance the user experience for our community partners and students. The redesigned interface provides an intuitive navigation system for users to engage with the IS Department, discover project opportunities, and explore educational resources.

Features

- **Dynamic Content Management:** Integration with a database to manage and display real-time project updates and information.
- **User-Friendly Interface:** A revamped UI that improves usability and accessibility across various devices.
- **Enhanced Search Functionality:** Advanced filtering options to allow users to easily find projects that align with their interests.
- **Interactive Elements:** Implementation of interactive components such as data visualizations to represent project impacts and success stories.

Impact

The newly developed website plays a pivotal role in elevating the department's ability to connect with the community, showcase student projects, and streamline the application process for potential partners. This has led to an improved process for engagement, creating a more accessible and efficient platform that aligns with the department's mission of innovation and collaboration.

Getting Started

To get a local copy up and running, follow these simple steps.

Prerequisites

Ensure you have the latest version of Node.js installed, which includes npm.

Installation

Clone the repository:

```
git clone https://github.com/your_username_/Project-Name.git
```

Install NPM packages:

```
npm install
```

Start the local development server:

```
npm start
```

The website should now be running on localhost:3000 or another port specified in the console.

Usage

For detailed instructions on how to use the website's features, please refer to the documentation available in the docs folder.

Contributing

Contributions are what make the open-source community such an amazing place to learn, inspire, and create. Any contributions you make are greatly appreciated.

If you have a suggestion that would make this better, please fork the repository and create a pull request. You can also simply open an issue with the tag "enhancement".
